

## ACCESS TO PATIENT INFORMATION

Immediate access to patient records is the foundation for quality patient care. For doctors, nurses, and other medical personnel that means having instant access at their fingertips – and because they are so mobile, it needs to be available no matter where they are. No more waiting in line at a nurses' station or updating patient records at the end of a long day.

In addition to instant access to patient records, the quality of those records is critical. Increasing the quality of patient records by being less dependent on potentially incomplete records, poor handwriting and transcription errors will help elevate the overall patient experience.

## SECURITY AND PATIENT PRIVACY

Security, patient privacy, and complying with HIPAA guidelines are top challenges for healthcare providers. A truly integrated solution that addresses these issues is paramount to the success of a wireless network solution. For healthcare providers, a wireless solution must provide comprehensive, secure and manageable services, as well as providing scalability. Planning and network design are key.

## UNCOMPROMISED PATIENT CARE

Wireless technology is becoming the new standard for healthcare systems. A wireless hospital will allow healthcare personnel to view patient information via devices such as laptops, pagers, and PDA's. This allows doctors to retain their mobility and still make informed decisions regarding patient care. And, they can make those decisions with confidence knowing that the information is up-to-date and accurate. Updating records, ordering tests and medication, and viewing lab results, can be done quickly and efficiently. Healthcare personnel will have more time to spend with patients, increasing patient satisfaction.

## THE CONSOLUS APPROACH

Consolus acts as your trusted partner and provides guidance and expertise to create the optimal network solution that addresses the most critical needs of a healthcare organization.

As a wireless systems integrator, Consolus offers a complete wireless solution, from hardware and application, to strategy, implementation, and on-going support. Inherent in a complete wireless solution are the following components:

- ◆ wireless site survey
- ◆ authentication and authorization
- ◆ network management and control systems
- ◆ security
- ◆ performance optimization
- ◆ network design and deployment

Consolus collaborates with healthcare executives to determine the networking needs today and for the future, and then delivers total solutions across the organization. Discovering the technology and connectivity solutions that best complement your organization is our priority.

## PROTECT YOUR INVESTMENT

Consolus has teamed with leaders in wireless technology, performance, management, and security to help you realize immediate benefit from a scalable wireless solution.

Consolus focuses on implementing sound technologies that can be implemented quickly and with minimal disruption to your organization. Consolus will work with you to eliminate inefficiencies and reduce your overall cost of ownership. With this approach, you can realize an immediate return on your investment.

Consolus realizes the importance of staying abreast of new technologies and provides on-going consultation regarding changing industry standards and their influence on the healthcare industry and your wireless solution.
